

High Performance Container Workshop

Current Prototype and Looking Ahead

Convergence of AI and HPC

Evidence for AI/DL trends

Trends in deep learning: hardware and multi-node

The field is moving fast – trying everything imaginable – survey results from 227 papers in the area of parallel deep learning

Deep Learning is largely on distributed memory today!

The Stack

```
--device=/dev/nvidia0
```

```
"Devices": [{  
  "PathOnHost": "/dev/nvidia0",  
  "PathInContainer": "/dev/nvidia0",  
  "CgroupPermissions": "rwm"  
}],
```

```
"devices": [{  
  "path": "/dev/nvidia0", "type": "c",  
  "major": 195, "minor": 0, "fileMode": 8630,  
  "uid": 0, "gid": 0  
},
```

```
"hooks": { "prestart": [ {"path": "/usr/local/bin/nvidia.sh"}] }
```

Houdini Plugin

Replying to @KuniSuzaki

Unlike (PRoot mode of) udocker, rootless Docker is faster and much secure, as it uses usersns instead of ptrace. Plus almost completely compatible to "rootful" Docker.

4:30 AM - 27 Jun 2018

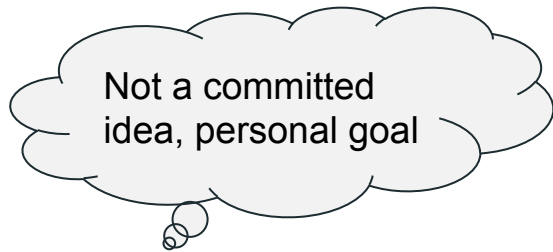

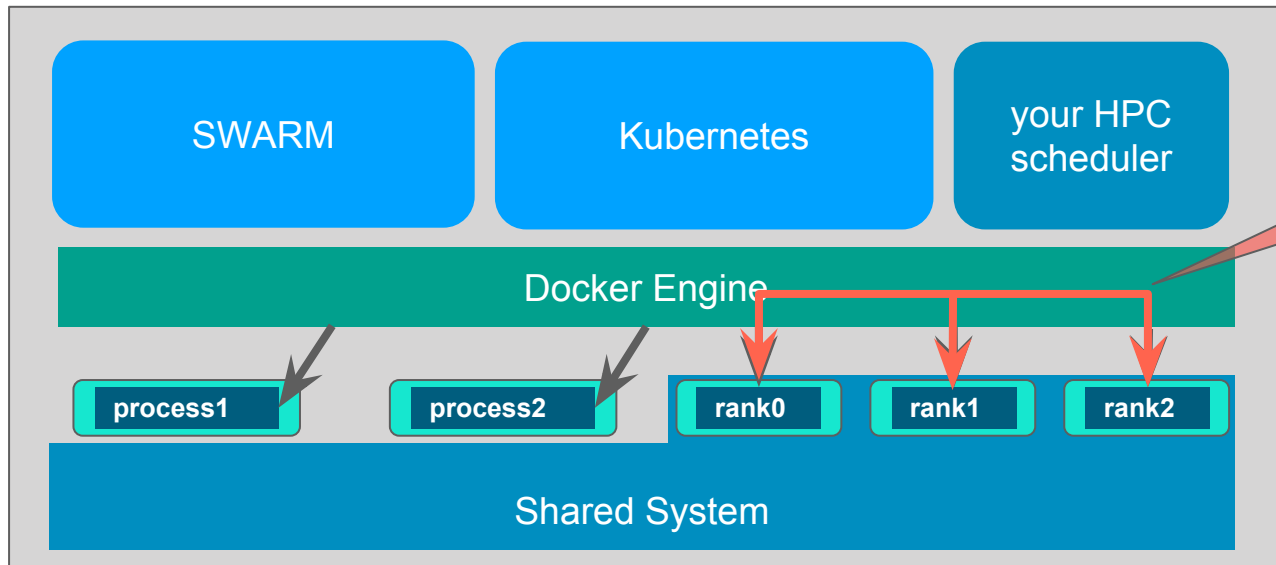

docker

Service + Batch Scheduling

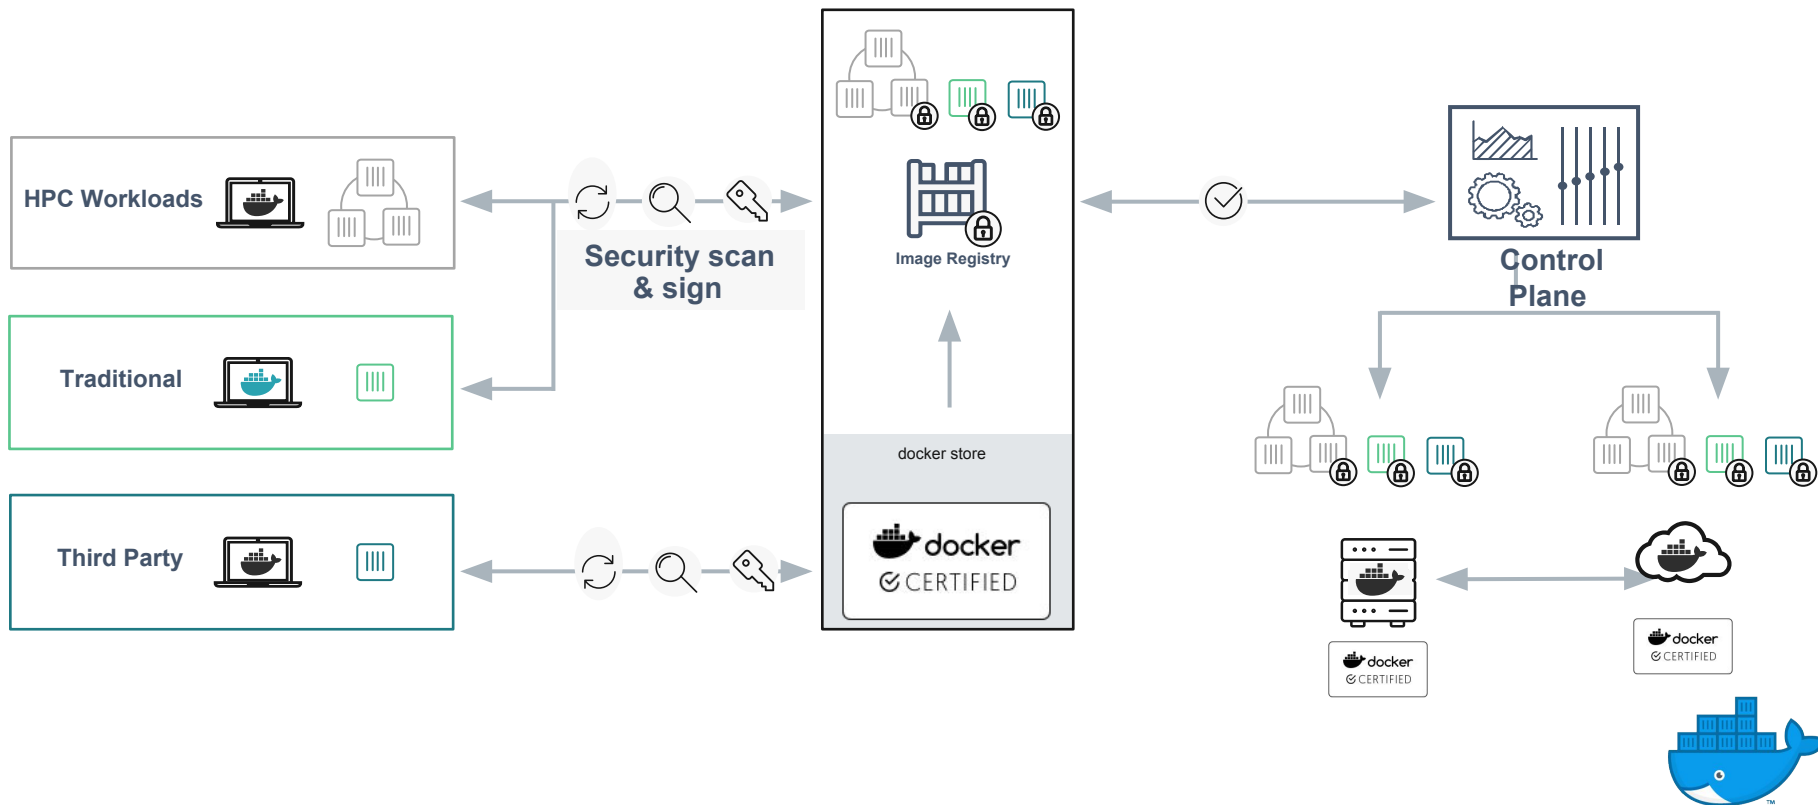

Having an SWARM extension to schedule batch jobs and the engine support PMI.

```
version: '4'
services:
  solver:
    image: qnib/openfoam
    deploy:
      mode: batch
      replicas: 16
    pmi:
      enable: true
      version: '2'
```

Leveraging HPC in the Enterprise / Enterprise in HPC

THANK YOU :)
